A Message From Kathy:

During our 100th day celebration we played games, incorporated math concepts, made pictures of ourselves at 100 years of age, counted items from mystery bags, made necklaces, took the "100 Day Physical Challenge" and had a blast incorporating the good round number 100 across the curriculum.

Why do we do this? What is the big deal?

1. It's a milestone for scholars (and teachers). We talk about all the learning we have done, and the learning yet to come. We re-visit our goals and expectations from the beginning of the year, and look forward to what we will be learning before the end of the year.
2. It incorporates a number of math concepts: Patterns, counting, sorting, measuring...you name it. There are all sorts of ways we utilize the concept during this day.
3. It's a way to combine all aspects of curriculum into one focused activity: The 100th day of school is not only about math. We incorporate reading, writing, science and social studies. It's a whole curriculum approach to learning.
4. And finally, it's a lot of fun! The symbolic representation marks a special opportunity to celebrate what we have learned and realize that WOW, we have learned a lot!

Thank you for your continued partnership. Ensuring the hopes and dreams that you have for your child's' school year is our goal. 100 days in and going strong!

Blessings,

Kathy | 949-698-3350

Curriculum around the book, "By the Great Horn Spoon!", has our 4th grade scholars reading with annotation, researching, writing, doing character identification and presentations that bring the California Gold Rush to life at the Academy.

WOULD YOU RATHER?

Would you rather have a magic carpet that flies, or have your own personal robot?
